

# Lion

***Category***

Big Cat (Mammal)

***Diet***

Carnivore: zebras, buffalo, antelope, wildebeest

***Habitat***

African savannas and grasslands

***Interesting Facts***

Lions are the only cats that live in groups called prides. Males have a thick mane.  
A lion's roar can be heard from 8 km away.

# Tiger

***Category***

Big Cat (Mammal)

***Diet***

Carnivore: deer, wild boar, buffalo

***Habitat***

Forests and grasslands of Asia, from India to Siberia

***Interesting Facts***

Tigers are the largest cat species. Each tiger has a unique stripe pattern. Unlike most cats, tigers love water and are strong swimmers.

# Leopard

***Category***

Big Cat (Mammal)

***Diet***

Carnivore: antelope, monkeys, rodents, birds

***Habitat***

Forests, savannas and mountains of Africa and Asia

***Interesting Facts***

Leopards have golden coats with dark rosette spots. They often drag their prey up into trees to keep it safe from scavengers.

# Elephant

***Category***

Mammal

***Diet***

Herbivore: grass, leaves, bark, fruit

***Habitat***

African savannas and forests, and Asian forests

***Interesting Facts***

Elephants are the largest land animals. They use their trunks to drink, smell, and grab objects. They live in family herds led by the oldest female.

# Giraffe

***Category***

Mammal

***Diet***

Herbivore: acacia leaves, shoots, fruit

***Habitat***

African savannas and open woodlands

***Interesting Facts***

Giraffes are the tallest animals on Earth, reaching about 5.5 meters. Their tongues are around 45 cm long and dark purple to resist sunburn.

# Zebra

***Category***

Mammal (Equid)

***Diet***

Herbivore: grasses, shrubs, bark

***Habitat***

African grasslands and savannas

***Interesting Facts***

Every zebra has a unique black and white stripe pattern. The stripes may help confuse predators and keep biting flies away.

# Hippopotamus

***Category***

Mammal

***Diet***

Herbivore: grass, eaten mostly at night

***Habitat***

Rivers and lakes of sub-Saharan Africa

***Interesting Facts***

Hippos spend most of the day in water to keep cool. Despite their size, they can run faster than a human on land. They are considered one of Africa's most dangerous animals.

# Chimpanzee

## ***Category***

Primate (Great Ape)

## ***Diet***

Omnivore: fruit, leaves, insects, small animals

## ***Habitat***

Rainforests and woodlands of West and Central Africa

## ***Interesting Facts***

Chimpanzees are our closest living relatives, sharing about 98% of our DNA. They use tools such as sticks to catch termites.

# Gorilla

***Category***

Primate (Great Ape)

***Diet***

Mostly herbivore: leaves, stems, fruit

***Habitat***

Rainforests and mountain forests of Central Africa

***Interesting Facts***

Gorillas are the largest living primates. They live in family groups led by a dominant silverback male. They are gentle and mostly peaceful.

# Brown Bear

***Category***

Bear (Mammal)

***Diet***

Omnivore: fish, berries, roots, small mammals

***Habitat***

Forests and mountains of North America, Europe and Asia

***Interesting Facts***

Brown bears hibernate during winter. They are excellent fishers, especially of salmon. They have an extremely strong sense of smell.

# Panda

***Category***

Bear (Mammal)

***Diet***

Herbivore: almost only bamboo, up to 14 kg per day

***Habitat***

Mountain bamboo forests of central China

***Interesting Facts***

Giant pandas have black and white fur and a special wrist bone that works like a thumb for gripping bamboo. They spend about 12 hours a day eating.

# Ostrich

***Category***

Bird (Flightless)

***Diet***

Omnivore: plants, seeds, insects

***Habitat***

African savannas and deserts

***Interesting Facts***

Ostriches are the largest and heaviest birds. They cannot fly but can run up to 70 km/h. They lay the biggest eggs of any bird.

# Penguin

***Category***

Bird (Flightless)

***Diet***

Carnivore: fish, squid, krill

***Habitat***

Cold coasts and ocean waters of the Southern Hemisphere, especially Antarctica

***Interesting Facts***

Penguins cannot fly but are fast swimmers. Their black and white coloring helps camouflage them in water. Emperor penguin males keep the egg warm on their feet.

# Peacock

***Category***

Bird

***Diet***

Omnivore: seeds, insects, small reptiles, plants

***Habitat***

Forests and farmlands of India and Southeast Asia

***Interesting Facts***

Male peacocks have long, colorful tail feathers that they fan out to attract females. Females are called peahens and are brown and less colorful.

# Crocodile

***Category***

Reptile

***Diet***

Carnivore: fish, birds, zebras, wildebeest

***Habitat***

Rivers, lakes and swamps of Africa, Asia, Australia and the Americas

***Interesting Facts***

Crocodiles are ancient reptiles that have survived for millions of years. They have one of the strongest bites in the animal kingdom and wait motionless to ambush prey.
